AB Cube

Since 2006, AB Cube offers software solutions and services to the vigilance industry.

AB Cube's team consists of computer engineers who specialize in vigilance software development as well as pharmaceutical industry professionals. This structure helps AB Cube to meet all its users' expectations and needs.

Our Customers

AB Cube's customers include pioneer biotech companies, leading pharmaceuticals and cosmetics laboratories, academics, national agencies but also many vigilance service providers and CROs.

The diversity of our customers ensures our knowledge and experience in all areas of vigilance, whether spontaneous notifications or clinical studies.

L'ORÉAL   CLARINS PARIS   mundipharma   septodont

Debiopharm Group   SERB LABORATOIRES   AIR LIQUIDE

SMB   macopharma   STRAGEN   innothera

We love CROs !

At AB Cube, we understand that vigilance service providers and CROs need flexibility and efficiency. We have designed a solution close to your needs.

AB Cube's software solutions help you save time and maximize your Return On Investment with:
- Centralized administration tools
- Large automation of tasks to help you save time and minimize mistakes
- Automatic generation of activity reports
- Gateways with National Agencies for easy submission of cases

For your business to remain highly flexible and adaptable, AB Cube guarantees:
- Speedy implementation of new databases, in 2 weeks maximum
- Unique implementation fee regardless of the number of databases you need
- High contractual flexibility

AB Cube's safety solutions are:
FDA 21CFR part 11 compliant
&
Validated according to GAMP 5
The full validation dossier is provided

Our Systems

AB Cube solutions allow to manage all vigilance processes from data entry to reporting:

- Management of spontaneous, literature and clinical study cases worldwide
- Audit trail / Case history for all actions performed on the system
- Edition of regulatory reports (Line listings, Summary Tabulations, CIOMS, MedWatch, E2B XML...)
- Query module with Excel file generation, link to SAS or Business Object
- Integration of MedDRA coding with SMQ
- Access to National Agencies' drugs databases
- Fully customizable workflow
- ...
